## FOR IMMEDIATE RELEASE

### **Recursion Software, Inc. wins Titan Fast 50 Award**

*Recognized among the top 25 fastest growing companies in the Dallas/Fort Worth area*

DALLAS, TX (August 24, 2004) – Recursion Software, Inc. is one of the fastest growing technology companies in the Dallas-Ft. Worth Metroplex, according to the Metroplex Technology Business Council (MTBC) of Richardson, Texas. Recursion Software, Inc. received the prestigious Titan Fast 50 Award for 2004. Awards were presented at the 4<sup>th</sup> annual Tech Titans Awards Gala on August 20, 2004 at the Eisemann Center in Richardson, Texas.

“We are pleased to be recognized as a leader in the software industry”, said Paul Lipari, President and CEO of Recursion Software, Inc. “By maintaining rigorous product schedules and outstanding customer service, we have been rewarded with a widened reputation for quality software products. We provide our customers with the software development tools and middleware they need to get their software applications to market on time and in a cost effective manner.”

Recursion Software, Inc. acquired the products of Objectspace, Inc., a leading developer of object oriented software development platforms and tools in 2001. Along with the award winning Voyager(R) development platform for distributed Java(TM) based applications, Recursion Software, Inc. also offers 3 sets of class libraries for C++, C# or .NET, and Java as well as a new product, CINERGI(TM). CINERGI enables the re-use of existing applications' code in new applications and virtually eliminates the need to rewrite code, giving companies the means to save money and time while taking advantage of embedded intellectual property.

The Technology Titan Fast 50 award recognizes the fifty fastest growing technology companies in the DFW Metroplex. Participants are either public or private companies. Contenders must have developed innovative, proprietary technology and are from a variety of areas including communications, computers, peripherals, Internet, life sciences, semi-conductors and software. This award is based on the percentage of revenue growth over either a one or a five-year period.
